

More Men Required on Forest Patrol

Carelessness of Campers is Criminal and Requires Stringent Measures to Detect Offenders

Despite warnings and propaganda by newspapers and posters to "Save the Forest," an instance of criminal neglect at this dangerously dry season was discovered in the Crow's Nest Forest reserve on Saturday evening, when a camp fire was left smouldering. Had a wind arisen before it was discovered, it may have resulted in destroying thousands of acres of timber. The discovery was made near the Racehorse creek, between the Livingstone range and the main chain of the Rockies, only a few miles from the forest ranger's station at North Fork.

It serves to show the necessity of the provincial government placing men on patrol in the forest reserves during the camping season. Rangers at present are forced to remain at their stations on call in the event of fire breaking out, consequently efficient patrol service cannot be maintained with such a scanty force.

A Mean Theft

Following the car accident on Sunday, the purse of Mrs. Tiffin was rifled of \$48, the purse being left with its other contents, also fishing rods and baskets were stolen.

Mr. Tiffin is still in a critical condition in Bellevue hospital; Mrs. Tiffin is making recovery in Coleman hospital, having a fractured rib and numerous head cuts and body bruises, and Mr. and Mrs. Ford though still suffering from the severe shock and bruises, are around again. The children escaped without serious injury.

Football Notes

On Thursday evening Corbin and Coleman played a hectic game here, the home team winning by a score of 1-0. Joe Emmerson as referee was given a warm time by some of the women supporters of the teams, but being an old hand at the game he prevailed upon warfare. Fifteen minutes before the regular time for closing the game, the ball burst, and Coleman was declared the winner.

Hillcrest played here on Saturday, and showed their superiority by scoring 6 goals to Coleman's 1.

Boy Scouts Break Camp

Reports of services at the Boy Scout camp and the inspection and field day are held over till next issue. A very successful ten day camp is closing to-day and the troops are returning home, suntanned and happy after camp life in ideal weather amid beautiful surroundings.

Church Army Crusaders

Special services Thursday and Friday at 8 p. m. in St. Alban's Church.

Sunday at 11 a. m. and 7 p. m.

Hear Capt. Wall, Capt. Haig and Sister Casey—you'll be thrilled with the Gospel stories and messages. Capt. Gibson and Capt. Bewley at St. Luke's, Blairmore.

Everybody Welcome and Bring a Friend!

It's Nice to Get Up in the Morning! Maybe!

Men who in civilian life would consider it almost an outrage to be asked to arise at three o'clock in the morning and plunge into a cold stream to push a car across a river or creek will gladly do it when on a fishing trip.

There is usually one in the party who will awaken the rest who might be inclined to sleep, unless it is too cold and blankets are few. Jerry Lonsbury roused the revelers for a party at Racehorse creek Sunday morning, and they left on a four mile walk up the creek long before the sun had appeared over the ridge of the Livingstones range.

Whilst Jerry's party were fixing up their fishing tackle at the spot they intended to commence fishing, another party of four headed by Maurice Cooke seemed to appear from thin air in the cold, gray dawn. Which of the two groups was the most surprised it would be hard to tell.

As Big Bill Antle, forest ranger at the Gap says, "you fishermen are all crazy, anyhow!" and one certainly is inclined to believe him when men will sit up all night or try and sleep on hard ground with the sky for a ceiling, and then wake in a creek all the following day. But it's a great life, especially when they are bitin' good.

Rod & Gun Club

The second competition of the season will be held on Sunday, Aug. 2, at South Fork. Cars will leave town hall at 7 a. m. Those intending to go must leave their names with A. Phillips or E. W. Beart positively no later than Friday evening. Fee is 75c for the day's competition. These rules must be complied with to enable transportation arrangements to be made in good time.

Drumheller All-Stars Defeated by Coleman

Coleman ball team out-starred Drumheller All-Stars on Friday evening to the tune of 8-2 in a nine-innings game in which Coleman played air tight ball throughout. Joe Kapalka, youthful pitcher for the home team, was given splendid support in the field, not an error being marked up against them. For Drumheller, Hocking pitched seven innings, and was replaced by Schmidt for the remaining two, but too late to make any change in the score for the visitors.

Not a home run was scored, but Coleman scored several three-baggers. The fielding by Coleman was beyond criticism, Bill Gate and Fraser starring in a number of long drives by Drumheller which they caught quite handily.

Peter Stelmachowich of Bellevue and Sophie Ostash of Coleman were married last Saturday at the United Church, Rev. A. E. Larke officiating. Quite a number of friends attended the ceremony.

Car Wreck Resulted in Serious Injury to R. Tiffin

Road Gave Way as Car Swerved and Rolled to Bottom of Ravine. Anxious Time for Parents When Children Imprisoned Beneath Upturned Car

To be driving on a road cut on the sharp slope of a hill, with a drop of over 75 feet and to feel the road give way and the car come hurtling to the ravine bottom, was the terrifying experience of a party from Coleman on Sunday afternoon.

Mr. and Mrs. Richard Tiffin were rendered unconscious as they were thrown from the car as it rolled, their two year old baby was burned in several places as it lay against the engine when the car lodged wheels uppermost at the ravine bottom, Mr. and Mrs. George Ford's two children were imprisoned beneath the car, suffering bruises and cuts, while their parents, though able to get out of the car when it came to rest, were badly bruised and shaken up. They were able to render aid to the more seriously injured.

George Ford, riding in the front seat with Mr. Tiffin, owner of the Chevrolet closed car, states that as they ascended a hill near South Fork bridge, about 1 o'clock Sunday afternoon, they espied a big rock embedded in the road. Tiffin had he straddled the wheels over the rock, might have passed safely over it, but to avoid it he swung the car towards the outer edge of the grade.

The occupants were horrified to feel the back of the car dropping for a second or two it hovered, then began its mad roll down the embankment. Some distance down it momentarily lodged against a tree; Ford thought he would be able to get out; but almost instantly the tree was torn up and the plunge continued to the bottom. Tiffin and his wife being thrown through the open windows, one from the front seat and the other from the rear. Quickly recovering from their dazed condition, Mr. and Mrs. Ford hastily surveyed the wreck and the unconscious bodies of their companions.

Church Army Crusade Arouses Keen Interest

Inspiring Messages at Daily Services Grip Attention of People—Welcome for All

Interest is increasing in the Crusade of Witness, now being held in St. Alban's, Coleman, and St. Luke's, Blairmore. The Crusade opened on Monday. Mrs. Casey, the wife of Captain Casey, who is field secretary of the Church Army in Canada, gave a short talk on the founding of the Church Army in England, by Preliminary Carlisle, about 49 years ago; she then told a little about the work in Canada.

Captain Wall delivered the main address, entitled "A Lost and Found Jesus." In this address he pointed out that Jesus came to seek the lost soul, but we must never lose sight of the fact that sometimes the soul must seek the Saviour, which it can so easily lose through carelessness.

At Tuesday's service Captain Hague gave a short talk on the Church Army training centre, giving an outline of the system. Captain Wall again delivered an inspiring address, his subject being "Three Views of the Cross." His subject at 8 p. m. this evening is "A Sunken God," and if titles are any indication, this address should be interesting.

At first they could not make out where their own children were, until they heard them crying, and they were imprisoned between the roof of the car and the rock ledge, the space being filled with earth and gravel.

Mr. Ford with feverish haste tore away the earth and removed the little 24-year old boy, but was unable to extricate the girl, Lillian, aged 5 years. She said she was not hurt and telling her to remain quite still, he set out in search of help. Though close to the road, yet cars could pass without noticing the wrecked car below, otherwise aid would have been on hand earlier. After nearly an hour he returned, but Mrs. Ford had secured the attention of some people in passing cars, and they lifted the wrecked Chevrolet and the little girl was none the worse beyond a severe fright.

Mrs. Tiffin in the meantime had in the meantime regained consciousness, but her husband was still unconscious. Dr. Stewart arrived from Blairmore, and he was removed to Bellevue hospital, while Mrs. Tiffin was brought into Coleman.

Mr. Tiffin, who is driver here at McGillivray mine, is reputed to be a careful driver, and at the time of the accident the car was not travelling fast. The earth road was very loose and in no condition to stand the weight of a car except on the centre of the grade. Mr. Ford states that a man living in the vicinity stated that it had been proposed to remove the rock some time ago, but through a change in road bosses in charge of the work, it had not been done.

Investigation was made by the provincial police, and the place was visited by a large number of people as soon as the accident became known.

Mrs. Casey will address the women on Friday afternoon at 3 p. m., to which all women are invited. Children's services will be held on Friday afternoon at 4:15 and on Sunday at 3 p. m.

Sunday services will be Holy Communion 8 a. m., morning prayer 11 a. m., Church Army mission service at 7 p. m.

Pigeon Flight Results

This week's flight was from Cardston, a distance of 62 miles by air line. Birds were released at 8:44 a. m. and the first bird reached home at 10:32 a. m.

Results:
yards per minute
Jean Clae 1001.97
J. Sudworth 1000.82

Mrs. Alfred Allison of Pincher Creek was the guest of Mrs. A. E. Larke at the week end.

Mr. and Mrs. H. C. McBurney returned this morning from two months tour in Eastern Canada.

Mr. and Mrs. A. B. Westworth left this morning for a visit to Vancouver.

Mr. and Mrs. J. Pietraszko, of Canal Flats, B.C., and their children, Helen, Violet and Frankie, are visiting with Mr. and Mrs. F. Tarabula. The children will remain here during the school holidays.

Visitors to Waterton Lakes on Sunday were Mr. and Mrs. S. Howarth and John, Arthur Kirkby, Miss Edna Fairhurst and L. Hart. Engine trouble on the car delayed their return to town till Monday.

"6,500 Laugh at Heat" reads a headline in the Lethbridge Herald, heading a report of attendance at the exhibition. One can just imagine them laughing—and feeling like stewed prunes at the same time.

Mrs. Fairfull of Calgary returned to the city on Friday, after spending several days as the guest of Mrs. Wm. Bell of the Grand Union hotel. On Wednesday Mrs. Bell, Mrs. Fairfull, Mrs. J. W. Derbyshire and Miss Mae Bell motored to Lethbridge to spend the day.

Reggie Jones has been spending his holidays at Waterton Lakes, and became so enamoured of wild life in the park that he gratuitously fed the bears, or at least they fed themselves without Reggie's permission by visiting his camp while he was absent during the day.

Mr. and Mrs. E. W. Beart motored to Cranbrook, their daughter, Mrs. Kennedy, returning to her home there after spending some time in Coleman. Mrs. Smilak accompanied them to Cranbrook, and whilst she was there a daughter was born to Mrs. Smilak's daughter, so she came home a grandmother.

Mr. and Mrs. Syd. D. Jenkins of Calgary, were recent visitors at the home of their daughter, Mrs. D. O. Macko, also Miss Jean Moon, of Calgary general hospital. Mr. and Mrs. A. Morris, of Kimberley, B.C. were the guests of Mr. and Mrs. Macko, and Miss Eileen Jenkins is spending the school vacation with her sister, Mrs. Macko.

The planes of the Canadian Air Pageant passed over Coleman on Monday, on their return from Vancouver eastward, but owing to the smoke haze it was difficult to distinguish them. The droning of the motors could be heard though the machines could not be seen. The auto gyro was the most easily seen, it passing over during the afternoon.

Mrs. H. H. Potter of Estevan, Sask., was a visitor with Mrs. H. T. Halliwell on Tuesday. Mr. and Mrs. Potter have been visiting with friends at Lundbreck, and leave to day for Creston, later resuming their journey via the Windermere highway to Calgary. Mr. Potter renewed acquaintance with a number of people here, as he was stationed in the Pass about 17 yrs. ago in the R.C.M.P. He now conducts a school of music at Estevan. On Tuesday he played in St. Alban's church for the Church Army special services.

Adolphe E. Cornez Passed Away Friday

Sorrow Expressed Over Death of Young Man Whose Life Had Been Spent in Coleman

On Friday last there died in Coleman hospital Adolphe E. Cornez, youngest son of Mr. and Mrs. A. Cornez, in his 23rd year. The cause of death was anemia, after a few weeks illness.

The funeral was held on Sunday, service being at the United church, Rev. A. E. Larke officiating. The pall-bearers were six members of the St. John Ambulance Association, of which this young man had been a member of the First Aid classes, and six of his friends, and walking beside the coffin were young flower girls and two boys bearing wreaths and flowers.

Deceased had worked for International Co. as an engine driver, and was a sturdy young fellow until the disease which proved fatal seized him. He is survived by his parents and an older brother, Achilles Cornez. He was born in Coleman, and attended the school here.

The large attendance at the funeral indicated the esteem in which he was held, and the sympathy of the community is extended to the family in the cutting off of a bright young man who was so well liked by all with whom he came in contact.

CARD OF THANKS

Mr. and Mrs. A. Cornez, and Mrs. and Mrs. Achille Cornez and family desire to thank all who so kindly sent flowers and to those who loaned cars for the funeral or assisted in other ways, in their bereavement. Thanks is also expressed to Mrs. Wood, Miss Rex and Harry Harris of the hospital for their kindnesses during the illness of Adolphe E. Cornez, and to the doctors, for their kind service; also to the boys and girls, friends of Adolphe, who acted as pall-bearers and flower girls.

Merchants—now is the time to order counter check books at direct from factory prices. Delivery will be made to suit your convenience. Do not allow your stock to run low before ordering, as it takes from ten days to two weeks to get orders completed after placing same. Prices gladly given on any style of book, also forms of various types for service garages.

F. M. Thompson Co. of Blairmore state their memmoh laign ale was well patronized by people from the Pass towns, and it will continue till Sat. Aug. 8. Be sure and get your share of the wonderful bargains that may be had and you'll find they will be high in quality and low in price. This is a genuine opportunity to economize.—F. M. Thompson Co., Blairmore.

Mrs. Jack Rogers and children leave this week for South Sloane, B.C., to which place Mr. Rogers went some weeks ago to take a position as machinist with West Kootenay Power and Light Co. Ltd. Mrs. Rogers has lived here for 24 years, and leaves many old friends, while Mr. Rogers was for 18 years machinist with McGillivray Creek Coal & Coke Co. Ltd. Recently they were the recipients of a presentation by the Oddfellows lodge, as a token of appreciation of friendship by fellow members. Mrs. Rogers is a daughter of Mr. and Mrs. David Gillespie, two of Coleman's respected pioneer residents.

Don't Let Constipation Lead You Into Serious Illness

Serious rectal troubles, piles, paralysis, hemorrhoids, are frequently the result of using cheap cathartics.

ENO is pleasant, gentle, safe and sure.

A daily dash of ENO in a glass of water every morning, tones up and sweetens the entire system.

ENO'S FRUIT SALT

Our National Parks.

One little item of national good which seems to have grown out of the prevailing and much discussed business depression is the increasing number of Canadians who are this year making visits to and holidaying in the National Parks of the Dominion. This very satisfactory development may have been caused by the financial inability of many people to indulge in more expensive trips, probably so, but it may also have resulted from increased publicity and a growing appreciation of these parks and the wonderful variety and beauty of scenic and other attractions which they present.

Canada, like all countries, has made some very good as well as some regrettable bad investments, but in no other department of national administration has more foresight been shown, or a better investment made than in the setting aside in all Provinces of generous areas as national playgrounds, and leaving them, for the most part, in a state of undisturbed natural beauty so that future generations in the centuries to come may know what this country was like before it became the home of teeming millions with all the artificialities which invention and an ever advancing machine-age may bring.

As a result of this foresight, Canada today can boast of the largest and finest system of National Parks possessed by any country in the world. Embraced within their boundaries are great mountain peaks, large lakes, wonderful rivers, beautiful waterfalls, almost every kind of wild animal known to the northern half of the continent, fish, trees and wild flowers of every variety. They are, in a word, Nature's great storehouses of natural wealth and beauty.

More than this, each National Park is an animal and bird preserve and sanctuary, thus providing a guarantee against the extinction of these wild species in this country and safeguarding Canada from similar losses sustained in other lands. In fact, Canada has done even better than this. Not many years ago people declared that the buffalo which once roamed the western prairies in countless thousands had become extinct. There were, however, a few held in captivity by private individuals in the United States. The Canadian Government, with foresight, seized the opportunity and purchased these animals, about 800 in all, twenty-three years ago, and brought them to Canada, placing them in the National Park at Watnagh, Alberta. Today there are 6,000 buffalo at Watnagh, 1,000 at Elk Island Park, Alberta, and about 13,000 at Wood Buffalo Park, Northwest Territories. All these herds are increasing.

Canadians thus have not only great national playgrounds but Nature's own zoological gardens. They constitute a national asset of great value today, which money could not buy, and which will increase rapidly in value with the passage of time. Full advantage of the National Parks should be taken by all citizens. They are easily accessible to most people, if not one park, then another one. In a year such as the present they offer the ideal holiday for people with but few dollars to spare. Take the children to them. Let them see the buffalo, the elk, the bears, in their natural habitat, and not merely by picture in school books. Let them, especially our prairie boys and girls, know the joy of roaming among the trees, and the keen delight of fishing.

Western winters are long, and sometimes excessively cold, when we must be cooped up in our houses. Therefore, let everybody get out of doors when and while they can, and revel in the beauties and the health-giving attributes of Nature. Adults will appreciate such a simple holiday, but the providing of it is a duty we owe to the children. Nature is the best doctor in the world, and we should go to her as often and for as long a visit as possible. And Nature can be seen at her best, and enjoyed to the utmost, in the National Parks of Canada—the great playgrounds which are the property of every Canadian citizen.

States Cannot Claim Hawks

Famous Aviator Born in Australia Is Still British Subject

Just as a matter of record, without casting any reflection or making any insinuations against anybody, may it be stated that Captain Frank Hawks, who recently cut the flying records from Montreal to Toronto, Toronto to Ottawa, and Montreal to New York, is not a United Statesman. He is an Australian and, therefore, British. His temporary home (if a man who is in the air most of the time can be said to have any home) is in Texas; but he is, and so far as we know has every intention of remaining, a British subject. So when next time your friend on the golf links or at the club talks about "Hawks, the American," please remind him that an Australian is not yet a citizen of the neighboring republic—Toronto Mail and Empire.

London women have a hatless craze.

Suffered Severe, Painful Cramps In Her Stomach

Those terrible cramps in the stomach that double you up in pain and make you break out in a cold perspiration, may be stopped by a few doses of Dr. Fowler's Extract of Wild Strawberry.

Mrs. Lloyd Jones, 204 Argyle St., Halifax, N.S., writes: "I have suffered greatly from severe and painful cramps in my stomach. I tried several remedies without result. One day a friend advised me to take Dr. Fowler's Extract of Wild Strawberry, so I bought a bottle and got instant relief."

Alberta Road Program

Work On Link With Trans-Canada Highway To Proceed
Construction work on the Alberta section of the proposed trans-Canada Highway will begin in the near future. It was intimated by the Provincial Government.

"Announcement of the road program was made following receipt of a wire from Senator Gideon Robertson, Federal Minister of Labor, stating not only that the Dominion Government will share with the Province on a 50-50 basis in the cost of the trans-Canada Highway, but that the Province may confidently anticipate a Federal contribution on highway construction in drought areas.

Three possible routes as Alberta links in the highway have been suggested, in answer to a request from Premier Bennett, as follows: Jasper, Edmonton and Lloydminster; Jasper, Edmonton and Watnagh; Jasper, Banff, Calgary and Medicine Hat. When a choice as between these is made by the Dominion authorities, lining up with the routes across the adjoining provinces, the way will be clear to begin actual operations.

Bounty On Wheat

Five Cents On Bushel Exported From Alberta and Saskatchewan
A resolution providing for the payment of five cents on every bushel of wheat exported from the Provinces of Alberta and Saskatchewan during the present year has been placed on the order paper of the House of Commons by Premier R. B. Bennett. This implements the announcement by Premier Bennett in his budget speech.

The resolution reads as follows: "Resolved that it is expedient to bring in a measure to provide that the Governor in Council may authorize the payment out of the consolidated revenue fund of the sum of five cents on every bushel of wheat exported from the Province of Alberta and Saskatchewan of the crop of 1931, and to make provision for the determination of amounts payable thereunder, and for regulations to carry out the purpose of the act and prescribe penalties to be incurred for breach of the act or regulations."

The Oil Of The People.—Many oils have come and gone, but Dr. Thomas' Electric Oil continues to maintain its position and increase its sphere of usefulness each year. Its sterling qualities have brought it to the front and kept it there, and it can truly be called the oil of the people. Thousands have benefited by it and would use no other preparation.

Abandon Rural Fairs

Sixty-Nine Agricultural Fairs In Saskatchewan Will Be Cancelled For This Year

Due to poor conditions, 69 agricultural fairs have been abandoned in Saskatchewan, J. G. Rayner, secretary of the Saskatchewan Agricultural Societies Association and director of extension work at the Saskatchewan University, has announced.

Altogether, 75 small exhibitions will be held this year. Most of the fairs which will not be held lie in southern Saskatchewan, although a few of the northern societies have decided to put off the fairs, due to lack of prize money.

Your Asthma, Too. The efficacy of J. D. Kellogg's Asthma Remedy is not something that is merely to be hoped for; it is to be expected. It seldom fails to bring relief, and to your own individual case it will do the same. So universal has been the success of this far-famed remedy that every one afflicted with this disease owes it to himself to try it.

Deaths By Violence

Increase Of Two Persons Per 100,000 Population Is Shown

An increase of two persons per 100,000 population in the number of deaths by violence is shown in a report issued by the Dominion Bureau of Statistics. The number of deaths by violence in Canada for 1930 was 7,468 as compared with 7,151 in 1929. Suicides numbered 1,007, a marked increase over 835 for the previous year, while homicides numbered 212 as against 182.

There were 6,246 accidental deaths, compared with 6,134 in 1929. Drownings numbered 1,067, deaths from fatalities 2,077 and automobile fatalities 1,289.

Western Market For Strawberries
Extension of the home market and capture of a western market are foreseen for Ontario strawberries as a result of "chilling" experiments recently at the Simcoe Cold Storage Plant. Contracts are now being made by the Simcoe plant with growers to ship the bulk of next season's crop to the western provinces and northern Ontario.

If the way of the transgressor is so awfully hard, why is it so many people follow it?

W. N. U. 1900

Wheat Marketing Problems

Premier Bracken Of Manitoba Pleaded With Outcome Of Regia

Commenting upon the two-day inter-provincial wheat conference held in Regina, Premier John Bracken, of Manitoba, expressed himself as well pleased with the outcome, and confident that the conclusions arrived at, and the steps taken to implement them would result in the creation of arrangements and machinery which would solve some of the most important problems connected with the operation of the pool elevator systems and wheat marketing.

While expressing hearty appreciation for what steps the Dominion Government was prepared to take by way of financing the handling and marketing of the 1931 crop, Premier Bracken financially regretted that the Federal authorities could not see their way clear to act upon the unanimous recommendation of the three prairie governments, and all the farm organizations of western Canada, that a wheat board be created to market the new crop. He stated further, that he was firmly convinced that a wheat board would have been a sound solution of the immediate wheat marketing problems and the best possible contribution to the serious economic emergency which exists in western Canada.

He was confident that the wheat board after the selling pressure of this fall was past, at which time the price effect of a number of fundamental corrections in the wheat situation would become apparent.

Continuing, Premier Mackenzie stated: "The vast majority of western farmers will be compelled by dire economic circumstances to market their 1931 crop as quickly as possible, at the very time Russia will be obliged to market the larger part of what is left of its surplus, and this will mean a further drop in price. The generally admitted absence of speculative investment buying to absorb the hedging pressure with the bearish influence of the uncertainties of the Russian situation, all this probability means lower prices at the time our farmers are delivering their crop than during the remainder of the year, with serious resultant disappointment to all those farmers who see prices on an upward trend. The control of their grain has passed beyond their hands."

First Aid Prize Awards

Championship This Year Goes To Kingston Army Medical Corps

"First aid" championship of Canada has been won this year by a team representing No. 3 Detachment of Royal Canadian Army Medical Corps, Kingston, Ont.

Results of the 1931 Dominion Trophy competition, conducted by the Canadian branch of the St. John Ambulance Association, show the R.C.A.M. team compiled a total of 291 points in the tests, as compared with 286 by the second ranking team composed of members of Canadian Pacific Railway police at Windsor.

Other competing teams in the order in which they finished and their point scores follow:

The Canadian National Railway's team, Fort Rouge Sheds, Winnipeg, 270; fourth, C.P.R. team of Nelson, B.C., 285; fifth, C.P.R. team of St. John, N.B., 250; sixth, Canmore Coal Company team No. 1, Canmore, Alta., 247; seventh, C.N.R. M.P., dept. team of Melville, Sask., 217.

Fighting Narcotic Evil

League Of Nations Reports Progress In Control Of Drug Traffic

The League of Nations experts have placed the amount of morphine which has passed into the illicit traffic between 1926 and 1930 at 100 tons. This amount they also add six tons of cocaine.

Other statistics, however, demonstrate that actual progress is really being made to control the drug evil. Exports of heroin, for example, into 14 countries, which are generally regarded as the centres of the illicit traffic, have fallen from 3,000 kilograms in 1926 to 41 kilograms in 1930 as a result of the League's efforts.

Ontario Relief Plan

Accord with the views of Hon. George Henry, Premier of Ontario, in connection with the establishment of labor battalions in that province was expressed recently by Hon. Gideon Robertson, Minister of Labor. The Minister, however, made it clear that no suggestion of compulsory work was associated with the method the Premier proposed to employ.

It is all very well to say that the speed need must go, but the trouble is that that's what he thinks, too.

Homeland Sends Greetings

London Papers Refer To British Columbia's Diamond Jubilee

"Hall British Columbia" is the heading of the London, England, Morning Post Leader in a recent issue referring to British Columbia's diamond jubilee as a province of Canada. The Post says the homeland sends affectionate and sincere good wishes to the province. It pays a tribute to the loyalty of British Columbia and recalls the courage and far-sighted vision of the pioneers of British Columbia and dwells on the development of the province into "one of the most progressive and prosperous communities in the Empire."

The Daily Express also congratulates British Columbia on its diamond jubilee, and says: "Perhaps other provinces of our great Dominion will forgive us if in this country we have special affections for the 60-year-old province beyond the Rockies owing to her flattering habit of remaining as English as possible."

Peace River Outlet

R.C. Government Fears Project May Be Delayed

The British Columbia Government, it is intimated, views with concern the possibility that the fate of the Peace River outlet question and the future of the Pacific Great Eastern Railway may be delayed in its decision by reference to the proposed Dominion general transportation royal commission.

While favoring the appointment of such a commission for general purposes, the government does not wish these two questions to be subjected to delay. The provincial authorities, it is stated, will communicate with the Dominion Government to learn whether these matters would be referred to the proposed commission.

Toothache and neuralgia are instantly relieved with Douglas' Egyptian Liniment. A quick, sure remedy. Also recommended for burns, sprains, sores and inflammation.

Canada Praised By

Sir Alexander Gibbs

For Wishing Efficient Management and Construction Of Harbours

Sir Alexander Gibbs, noted English port authority and engineer, who has been commissioned by Canada to conduct an investigation into the functioning of Canadian harbours, arrived at Quebec recently. Sir Alexander stated that Canada was giving an example to other countries in wishing efficient management and construction of her harbours. His task was of the highest importance, he said, adding that he felt honored in having been chosen to conduct the inquiry.

Light Cattle Wanted

Canada must produce more lightweight beef cattle to hold its market in Britain and to take care of home consumption contends Howard F. Raleigh, M.L.A., Lambton West, in a report prepared for the agricultural committee of the Ontario legislature, following an investigation of conditions surrounding the cattle-breeding industry.

Coast-To-Coast Telephone

Trans-Canada Telephone Line Will Be 4,283 Miles In Length

Direct telephone communication between Montreal and Winnipeg is now established, and marks the closing of another gap in a trans-Canada telephone system, which is expected to join Halifax on the Atlantic seaboard with Vancouver on the Pacific Coast, by the end of 1931. In all, eight telephone systems are co-operating in this coast-to-coast hook-up, which is designed to keep all purely Canadian telephone calls entirely within the boundaries of the Dominion.

The trans-Canada telephone line will be 4,283 miles in length, made up of 142 miles in Nova Scotia, 385 in New Brunswick, 1,362 in Quebec and Ontario, 242 in Manitoba, 465 in Saskatchewan, 418 in Alberta, and 569 in British Columbia. A total of 22 repeater stations will be necessary to boost-up the electrical impulses that carry a voice on its long journey across Canada.

Immediately preceding the opening of the Montreal-Winnipeg connection on July 4th, a third commercial line from Toronto to Winnipeg and one which provides direct communication, free from intermediate switching at any point on the line, was brought into use. The first service between Toronto and Winnipeg was established in 1928, and two of the circuits now in operation are equipped with carrier current apparatus, permitting several simultaneous conversations on the same pair of circuit wires.

The eastern link of the system between Halifax and Montreal was completed in January, 1928, and the recent hook-up completes the line from Halifax to Winnipeg. Much work has been done in this connection in Western Canada, a three-channel carrier system already operating between Regina and Calgary, and the work laid out by the provincially-owned system of Manitoba, Saskatchewan, and Alberta, together with the British Columbia Telephone Company, provides for the opening of the whole line this year.

Promotion Well Merited

Twenty-two years of service with the Royal Canadian Mounted Police (a good deal of which was put in with the old North West Mounted Police), which took him at one time into the Arctic regions in northern Canada for a period of two years, has brought Sergeant William Shutz of Weyburn, a well merited promotion to the rank of an inspector.

Complete in itself, Mother Graves' Worm Exterminator does not require the assistance of any other medicine to make it effective. It does not fail to do its work.

The reason so many people miss the road of old happiness is because when they come to it, it looks so much like a detour they take the better-looking side.

Cut Down Food Wastage

--- by covering all perishable goods with Para-Sani Heavy Waxed Paper. Para-Sani moisture-proof texture will keep them fresh until you are ready to use them.

You'll find the Para-Sani sanitary knife-edged carton handy. Or use "Centre Pull" Packs in sheet form for less exacting uses. At grocers, druggists, stationers.

Winston Churchill Sees Nothing But Chaos In German Situation

Berlin, Germany.—The Borsen Courier Sunday, prints a sensational article by Rt. Hon. Winston Churchill, former British Chancellor of the Exchequer, in which the post-war years up to today are pictured as "merely a continuation of the world war, with Germany and France the antagonists and Great Britain and the United States the unwitting financiers of a struggle in which they have no choice to win anything."

The Anglo-Saxon nations, however, still may "escape with their skins," the article says, "by standing together and letting Europe's antagonists topple into the abyss clutching each other's throats."

"The old system of exploiting the defeated enemy," it continues, "was to carry away all the gold and beautiful women and other booty that could be carried away and then to let the ravaged land get back to its feet as best it could, which might be in a comparatively few years."

"The new plan, however, tried after the world war, was to make a perpetual and highly organized cull out of the defeated nation—something that could be milked ad infinitum."

"Great Britain and the United States foolishly financed this attempt, but France, with a keen sense of reality, protected herself against its inevitable collapse."

Germany, Mr. Churchill said, "whose logical defensive strategy was to wreck the plan of borrowing money as fast as Great Britain and the United States would lend it, regarded purely as war strategy, accomplished a brilliant counter-stroke against the Versailles treaty."

Meanwhile, he said, while nations gold borrowed from the United States and Great Britain, "was flowing securely into France's bullion vaults, Great Britain and the United States were becoming more and more deeply involved with Germany. Finally, after the Wall Street crash, it began to dawn on various Anglo-Saxon bankers and there began a quiet, but later vigorous, demand for withdrawal of money from Germany."

"The result was a crisis that set the whole German structure trembling and the whole world worrying, with the exception of France, the only country which anchored itself in reality."

France, he said, "is not worrying about Germany going Bolshevik." If Germany can not pay, he added, the French "will take and hold by force everything they can lay hands on."

"What is there to do?" Mr. Churchill asks, and concludes with the answer:

"We'll do anything we can for the others, if they are reasonable; but if they are not, then Great Britain and the United States, with mutual loyalty, and dealing justly and mildly with the others, will be strong enough to go their way alone."

Move From Dry Areas

Alberta Farmers Take Up Land Northwest Of Edmonton

Edmonton, Alberta.—Some 38 families, out of 74 applications received and approved, have already been moved from the drought area around Hanna to new locations northeast and northwest of Edmonton, where most of them have taken up homesteads.

They brought their stock and effects, each family being allowed two carloads, under the free freight policy agreed upon between the government and the railways.

Numbers of other farmers from the dry belt are now looking for suitable locations, and the Department of Agriculture has men at work helping them.

It is expected by provincial officials of the Department of Agriculture that there will be a considerable movement of settlers during the next three weeks, the policy having until August 15 to run.

Thousands Attend Garden Party London, England.—Ten thousand persons thronged the gardens of Buckingham Palace for one of the rare garden parties given by the King and Queen. Among the guests were some of the statesmen who have been fighting the crisis in Germany.

A warm sunny day made the expansive garden with its bright flowers an ideal setting for the gay function.

Increase In Tourist Business Ottawa, Ont.—The widely-held belief that tourists are not touring in these days of "tight money" has been discredited so far as Ottawa is concerned. Civic figures just released show 1,938 persons have registered at the Lansdowne Park tourist camp so far this summer, an increase of 50 per cent. over the same period last year.

Temporary Measures Are Taken To Avert German Financial Crisis

London, England.—The seven-power conference has ended after taking temporary measures to revive world confidence in Germany's financial and economic future.

As it was forecast, these palliatives were confined to a three-month extension of the \$100,000,000 loan granted to the Reichsbank through the Bank of International Settlements, to concerted measures in all countries for the maintenance of existing credits in Germany and to recommendations dealing with Germany's future needs.

The final plenary session at the foreign office in Downing Street, London, England, ended with felicitous farewells which stressed the interdependence of nations, and welcomed the participation of the United States at the European council table.

While the conference was being generally hailed as a success, little enthusiasm could be found at the headquarters of the German delegation. Although admitting the Brüning Government has secured a breathing spell in its international financial crisis through the achievements of the London meeting, and also secured an internal breathing spell with the defeat of Nationalist and Communist efforts to convene the Reichstag, Chancellor Brüning and Foreign Minister Curtius are still risking a political position, according to German view, unless they return to Berlin with some tangible assurance of new credits.

On the other hand, the British, French and American delegations were agreed that the London meeting had accomplished its purpose as far as checking Germany's rush toward a financial collapse is concerned.

As far as new credits for Germany are concerned, all the London meet-

ing did was to "note with interest" the joint guarantees recently placed by hundreds of German industrial concerns. Upon these great concerns, Germany, by a recent emergency decree, could have asked for credit amounting to \$500,000,000, and the German view is that unless some such deal is consummated, the Brüning Government will again be in danger of collapse.

It was also recommended that the World Bank for International Settlements establish immediately a committee to study the whole question of German credit needs, including the possibility of converting a portion of the short term credits into long term credits.

World Wheat Crop Less

Heavy Decrease In Production From Last Year Is Anticipated Washington.—A world wheat crop of 250,000,000 to 300,000,000 bushels less than last year is forecasted by the Agriculture Department in its latest summary of 1931 prospects.

Surplus stocks of old wheat, however, may total 100,000,000 bushels more than remained on hand July 1, 1930, in exporting countries. On the other hand supplies in importing nations are probably smaller, the department said.

The farm board is considering the sale of some stabilization wheat in foreign countries. Chairman Stone said, however, no definite agreements have been made.

The board has advanced as well as received some offers, he added, and would consider sales on a reasonable credit basis.

In response to requests for a new sales policy, the board agreed to limit sales to 60,000,000 bushels this year "exclusive of sales to foreign governments now under consideration."

Canadian wheat production, sharply reduced by drought, may be 150,000,000 bushels below 1930, while acreage reductions in Argentina and Australia together may bring about a further reduction of 100,000,000.

The department said some curtailment is to be expected in Russia through smaller yields, although acreage planted is considerable. Balkan countries also are harvesting smaller crops. Importing countries of central Europe, on the other hand, have better prospects than last year.

The department said Russia was an uncertain factor in the world wheat situation, adding that its carry-over from the large 1930 crop is probably larger than that from the previous season. Russian exports, it said, might be more than last season because of the larger surplus at the beginning of the new crop year.

Trans-Canada Flight

Non-Stop Flight From Halifax To Vancouver In August

Vancouver, B.C.—The first non-stop flight from Halifax to Vancouver will take place during the Canada Pacific exhibition from August 22 to 29, it is announced by J. K. Matheson, general manager of the Vancouver Exhibition Association, who has been in communication with sponsors of the flight.

The flight was originally planned to take place during the airport celebrations, but now it is likely to be held up with the exhibition. J. Williams, agent for the flight in Montreal, has forwarded details for consideration by a well-known French war ace, who is at present in Canada, it is stated.

Proposal also has been made from the same source that a round-the-world flight in an attempt to break the Gatty-Post record be made, starting from Vancouver on the opening date of 1932 exhibition, and being completed here before the close, seven days later. This matter will also be considered by directors.

Building Road In North

Will Open Up Route From Pin Flin To Hudson Bay Junction

Regina, Sask.—Construction on the new government road from Turnberry to Hudson Bay Junction, opening up the route from Pin Flin, Manitoba, is proceeding in good shape, according to Hon. J. A. Mackenzie, Minister of Railways, Labor and Industry, who said that it is expected the earth grading will be completed by the coming fall.

At Turnberry the Manitoba department meets the Saskatchewan road and proceeds north to The Pas and Pin Flin.

All this construction is being undertaken by relief work.

PRESIDENT-ELECT

Carleton W. Stanley, President-elect of the famous Dalhousie University in Nova Scotia.

Saskatchewan Relief

Hon. Howard McConnell Says Hundred Thousand Residents Will Require Aid

Montreal, Que.—About 100,000 residents of Saskatchewan will have to be fed by the Provincial and Federal Governments during the coming winter. Livestock to the number of 150,000 head will have to be taken from drought areas to spots where the feed is more plentiful. Yet Saskatchewan will recover its lost wealth, according to Hon. Howard McConnell, K.C., provincial treasurer and minister of municipal affairs, who was in Montreal to consult with officers of the Royal Bank of Canada in connection with the financial situation of the western province.

Out of the 302 townships in Saskatchewan, 75 will require Federal and Provincial relief during the coming winter, according to Mr. McConnell.

"The drought has been so bad," he said, "that even potatoes have not grown in some sections of the province. That is why we will have to feed so many people through the winter. It is without a doubt the most severe rainless spell that the west has had since the beginning of the century."

"People here in the east," he continued, "are inclined to reproach us sometimes, because we are now in distress. But you must remember that we now have had three years of bad crops and very low prices. Actually we have not had a good rain in Saskatchewan since July, 1929."

But the present condition in Saskatchewan is only temporary, according to Mr. McConnell. Low crop yields in wheat producing countries, smaller acreages seeded, will soon absorb the wheat surplus, then prices will rise once more and Saskatchewan will be well off.

Construction Of Peace River Outlet Urged

Work Should Be Started Now Says Bow River Member

Ottawa, Ont.—Urging construction of the Peace River outlet, E. J. Garland (U.F.A., Bow River) in the House of Commons stated that both major political parties were pledged to the proposal. The time for carrying out this work was during depressed conditions rather than waiting for good times, he said.

One of the principal objections had been removed by the taking over of the railways in northern Alberta by the C.P.R. and the C.N.R., the joint management. A survey of the various routes had been made by the C.P.R. recently. Mr. Garland preceded his remarks by a resume of the requests made since 1924 for the building of the outlet and the consideration given the matter by committees of the House from time to time.

All Wheat Delivered To Licensed Elevators Will Receive Five Cent. Bonus

Ottawa, Ont.—All wheat delivered to any licensed elevator in the western grain inspection division will be considered as wheat for export regardless of its destination and be entitled to the five cent a bushel bonus. It also applies to wheat sold to commission merchants, truck buyers or grain dealers as defined by the Canada Grain Act. The estimated cost of this bonus to the Dominion will be \$6,500,000.

These were some of the points stressed in the House of Commons by Premier R. B. Bennett when the bill making provision for this grant was given second reading. The act is to expire on July 31, 1932.

"Will this apply only to wheat for export?" asked Thomas Reid, liberal member for New Westminster. "It will mean wheat delivered to any licensed elevator in the western inspection division, commission merchants, truck buyers, or grain dealers as defined by the Canada Grain Act," replied Premier R. B. Bennett.

"Did I understand the Prime Minister to say that this five-cent subsidy was to be administered by the grain commission?" pursued John Vallance, Liberal, of South Battleford.

"The Board of Grain Commissioners," was the Prime Minister's reply.

"I find that this is not an export subsidy but a producers' bonus. Am I right in that assumption?" asked Mr. Vallance.

"Substantially that is right," replied the Prime Minister. "It will discuss it later in detail."

Reasons for the measure were given to the House by the Prime Minister. The first was that of the low price of wheat in the markets of the province. The sudden collapse of the wheat market had brought about a condition in western Canada that was being felt all over this country, particularly in eastern Canada, where this section relied to no small extent upon the purchasing power of the western population.

The second reason, brought about largely through the first, was that the price received for grain did not bear relation to the cost of production which it had heretofore.

The third reason was the necessity of a measure of relief for western Canada producers. He had been told, the Prime Minister proceeded, by those who were better able than he was to speak with authority, that the effect of the measure would be excellent and would lessen the amount which the Dominion might have to contribute with the provinces towards direct relief.

Thomas McMillan (Lib., Huron South) wondered why the assistance was not made to apply to all wheat. Hon. W. R. Motherwell (Lib., Mel-

fort), said that local mills would be discriminated against.

J. L. Brown (Lib., Ligar) protested against the illustration given by the Prime Minister that a farmer obtaining a yield of 10 bushels an acre from a 150-acre farm, would benefit to the extent of \$75 under this proposal, and that \$75 was more than the tariff increases would take from him. That was a condition of things that did not exist. He could not accept the proposal as a compensating adjustment of the burden imposed by the recent budget.

Itinerary Of The Lindberghs

Will Fly Nearly One-Third Of Earth's Circumference To Reach Tokyo

Washington, D.C.—Col. and Mrs. Charles A. Lindbergh will fly nearly one-third of the earth's circumference to reach Tokyo. This is the computation of the Navy Hydrographic Office, which puts at 7,132 statute miles the New York flight to Tokyo route of the projected Lindbergh flight. The distance becomes 7,254 miles should Washington be the starting point.

The 12 hops in which Lindbergh has planned his flight through Canada, Alaska, across the Bering Sea, Kamchatka and Japan were found to range from 336.2 miles to 1,115.

Distances given were: New York to Ottawa, 336.2 miles; to Moose Factory, 461; to Churchill on Hudson Bay, 751.5; to Baker Lake, 377; to Aklavik, 1,115; to Point Barrow, Alaska, 536.5; to Nome, 523.5; to Karaginsk, Siberia, 1,087; to Petropavlovsk, 454; to Nemuro, Japan, 897; to Tokyo, 613.5.

The distance from Washington to Ottawa is 458 miles.

Premiers Confer At Winnipeg

Discuss Plans For Relieving the Western Wheat Crisis

Winnipeg, Man.—Prairie government representatives were in conference here discussing moves that will aid in relieving the west's wheat crisis. Premier J. E. Brownlee, of Alberta, was present and joined Premier John Bracken, of Manitoba, and Hon. Jas. F. Bryant, K.C., Saskatchewan Minister of Public Works, in conferring with wheat pool heads regarding handling and financing of this year's crop.

Establishment of an interprovincial trading corporation and re-orientation of the wheat pools, permitting marketing of the 1931 crop according to a formula laid down by Premier R. B. Bennett, was said to have held the attention of the conferees. It was learned a great deal of work was accomplished towards launching the organization.

Bill Is Passed To Relieve Cabinet Ministers From Seeking Re-Election

Ottawa, Ont.—Government-sponsored after it had apparently been some time ago, a bill which relieves members of the House who are appointed cabinet ministers from seeking re-election in their constituencies, was given third reading in the House of Commons. Passing of the bill, introduced by Hon. Hugh Guthrie, Minister of Justice, came after a two-hour discussion.

An amendment from the Liberal front benches was defeated before final approval was given the legislation, which now goes to the senate.

The bill which passed in its final stages has an interesting history. Originally introduced as a private member's measure by S. W. Jacobs, Liberal member for Carleton Place, it passed first and second reading in the House.

It met its Waterloo, however, on a motion for consideration in committee. The government determined that the measure should pass, and Hon. Hugh Guthrie, Minister of Justice, subsequently introduced a motion, which carried, calling for its restoration to the order paper. Thursday, July 23, with the support of the Government, it went through the remaining stages.

Opposition came from Rt. Hon. Mackenzie King, Liberal Leader. The administration, he suggested, must have lost confidence in itself, or it would not hesitate to seek the endorsement of the people for cabinet changes. While admitting that in

Great Britain the necessity for re-election had been removed, conditions in the two countries were very different. Mr. King stated.

The bill would give the Government power to ignore divisions along racial, economic and religious lines. The sound principle of the measure had inspired the Government to take it over, retorted Mr. Guthrie. He denied that the Government feared to face by-elections, and remarked that in East Hamilton the Liberal Party was not even represented by a candidate. Saving of expense, expedition of public business, and convenience to Government were the three reasons for the bill.

In the committee stage, Hon. Ernest Lapointe, former Minister of Justice, moved an amendment which would have the effect of limiting the period in which a newly-appointed minister would not have to go back for re-election to nine months after the proclamation summoning a new parliament. The amendment was declared lost without a standing vote.

Opposition to the bill was expressed by Armand Lavergne, Conservative member for Montserrat, and Deputy Speaker of the House. When a member accepted cabinet rank, said Mr. Lavergne, his constituents should be given an opportunity to pass upon the change.

Mr. Jacobs supported the bill, expressing satisfaction that it was finally to pass the House of Commons.

W. N. U. 1900

FAMOUS WOMEN SHOTS ATTEND BISLEY MEET

This picture shows two women competitors taking part in the Bisley Shooting Meet in England, and proves conclusively that a rifle is more dangerous in some women's hands than in men's. The fair competitors are Miss E. Babcock (left) and Miss M. Foster (right), the latter being the winner of last year's King's Prize. To win this most coveted trophy in the rifle world, Miss Foster had to shoot her way to victory over 1,000 experts from all parts of the British Empire.

NOTES AND COMMENTS

The best way for men to keep cool during the warm weather is to discard collar and tie, coat and vest, and let appearances go by the board. It may not be according to Hoyle, but it's comfortable. It is the next best thing, or even cooler, than wearing a Palm Beach suit, especially when you cannot afford even a new straw hat.

Now if the purveyors of men's clothing—"walk upstairs and save ten"—were to run a few display advertisements in this family journal, they would instantly create additional business, for we would convert the proceeds into a brand new suit and make the world imagine we were really prosperous. But apparently they imagine that everybody who buys suits or should buy have no further need of them, for we have not even seen an advertisement describing new or freakish styles. The result is that many a man looks tenderly at the clothes he is wearing, and because he sees nothing advertised to stir up his imagination or awaken his self-pride, he consoles himself with the thought that the old duds are not in such bad shape after all, and a trip to the cleaners will bring them back looking as good as new.

Now, if a purveyor of clothing reads this, he might realize that the reason he is not selling men's suits is because they are not being advertised, for advertising is the life-blood of business; so the big fellows say who are using page ads. in the dailies and giving our postmasters some heavy work to do in distributing catalogues.

While we are on the subject—we commenced this with just a mere thought about hot weather—there are hundreds of small retailers who do not and cannot get the mental slant on advertising whereby they might employ the best medium at their command to increase their business. That old stock phrase—"Oh, everyone knows me!" is very threadbare. Everyone knows Eaton and Simpson far better than they know their local dealers, and they know what they sell and what the prices are. That's why so much money, like the boys and girls, leaves home. It is attracted by publicity—advertising. Yet when a fellow points this out to a local retailer, he looks at you with a mournful eye and says: "Oh, everyone knows me! I do not need to advertise!"

What does the public think of it? The answer is plain. They keep away from the places that do not advertise, because they see no information of interest. The public memory is about as short as the docked tail of a fox terrier.

Gillette had every man by the whiskers when he brought out his safety razor at \$5.00 a throw; Then some imitators of his genius made a cheaper razor and advertised it, till as a result of the battle in safety razors, you get them thrown in with a packet of blades. But Gillette made enough money by liberal advertising to make him safe for ever—or at least he should be.

There is a good retail field in Coleman, but it must be cultivated as assiduously as the potato patch at the back of

your lot. Looking out of store windows with a yearning eye, as if waiting for the cows to come home at milking time, is wasted time, especially when like the busy little bee, one can always improve the shining hour, even if it is hot (not the bee) and buyers are few. Stir 'em up—make 'em sit up and take notice by utilizing some valuable time in thinking up the good points of what you have to sell, and tell the people all about it in your local newspaper. Everyone is pretty much like the man from Missouri.

We commenced with a little comment on the heat, and became so warmed up that we simply had to get this off in order to try and stir up more business in our own particular line, for 'tis true enough that the Lord helps those who help themselves, and this is how we spent part of Saturday afternoon when the temptation to go fishing and the call of duty were having a battle royal.

Coal is coal, but there are many grades. A gentleman from Winnipeg spent part of the week in the mining district, getting acquainted with the coal operators and keeping his weather eye and cocked ear open for information on steam coal for Winnipeg hydro-electric. Recently one of the Winnipeg heating companies purchased 42,000 tons of American coal, and when criticized for it, told the public from whom they derive their revenue that loyalty and patriotism was none of their concern, only dollars and cents counted. We have been told that too, when trying to sell printing orders, but still we keep up the battle and try and create a favorable public opinion for Canadian coal. If we all engaged in cut-throat competitive business, wages would be at the starvation point, in fact people would become so oppressed they would rise in their wrath. But then there is always someone who thinks he can do

things cheaper than everybody else, until he becomes bankrupt or dies from worry.

That's how it is with the coal business. One mine finds it can mine coal cheaper than

another, and immediately it cuts the price. Open warfare might ensue until orders are placed which allow no profit and people are reduced to the position of mere wage slaves.

As a rule, the richer you are the better you fare, but with a million in your pocket you could command no finer brew.

Millionaires could demand no more of a beverage, healthful and refreshing of body and mind, and a real kindness to digestion.

AGENTS FOR THE BREWING INDUSTRY OF ALBERTA

DISTRIBUTORS LIMITED

Heavy Distribution Of Fish Fry From Prairie Province Hatcheries To Stock Lakes And Streams

More than 478,000,000 fish eggs, fry, fingerlings, and yearling fish, and a few older fish, were distributed last year from the hatchery establishments operated by the Fish Culture Division of the Canadian Department of Fisheries.

There were Atlantic salmon, speckled trout, rainbow trout, brown trout, hybrid brown trout, a few albino brown trout, loch leven trout, salmon trout, cut-throat, Kamloops trout, cut-throat and Kamloops cross, ouananiche, landlocked salmon, pickerel, whitefish, sockeye salmon, spring salmon, coho salmon, chum salmon, steelhead salmon or trout, and Kennerly's salmon.

By such distributions, which go on from year to year, the Fish Culture Division assists nature in maintaining and increasing the existing supplies of fish in various Canadian waters, stocks lakes and streams which are barren, and introduces different species of fish into areas to which they are not indigenous, thus making more fish swim where fewer swam before and aiding both the commercial fishermen and the anglers.

The largest distribution was from the hatcheries in the Prairie Provinces. From the hatchery establishments in Manitoba there was a whitefish distribution of about 130,000,000 and a pickerel distribution of over 100,000,000. In addition, there was a salmon trout distribution of upwards of 185,000. From the hatchery at Fort Qu'Appelle, Saskatchewan, nearly 15,000,000 eggs, etc., were sent out—whitefish, by far the greater part, some pickerel eggs, and some brown trout. The distribution from the Alberta hatcheries reached a total of more than 103,250,000.

Safety In Flying

Accidents Would Be Reduced If Proper Precautions Were Always Taken

Col. W. A. Bishop, V.C., Canada's most famous aviator in the Great War, was twitted the other day when, as he was about to take off on a flight in Eastern Canada, he made a most careful preliminary inspection of the plane that was to bear him. He checked the wires, rigging, wings and tail parts and listened to the hum of the motor. To those who twitted him, he made a remark that deserves a good deal of attention. "I'm not fussy about being the world's smartest pilot. I just want to be the oldest one."

Here is an epigrammatic utterance deserving of the notice not only of aviators but of motorists and others who have anything to do with machinery. The accident list would be materially reduced if everyone took the precaution of satisfying themselves, before applying the power, that their machines were in first-class shape. Longevity has its attractions notwithstanding the considerable passion for speed and daring—Regina Leader-Post.

Will Not Be Eclipsed

The Eiffel Tower in Paris apparently does not intend to be eclipsed by the completion of the Empire State Building in New York. It is receiving a coat of yellow paint, which makes it more than ever the dominant feature of the Parisian landscape. What it may lack in height as compared with New York's latest skyscraper it intends to make up in brightness.

Magistrate (to woman involved in an unhappy matrimonial dispute): Did you and your husband quarrel on Friday night?

Wife: What! And the next day pay day? Certainly not!

"Mother, is it true that a camel can work for a week without drinking?"
"Yes, And your father can drink for a week without working!"—Moustique, Charleroi.

Menace To Aviation's Future

President Of Aeronautical Federation Deplores Stunt Flights Across Atlantic

Trans-Atlantic flights of the hazardous variety are a menace to aviation's future, according to Prince Georges Bibeau, Aeronautical Federation president.

"Protest against flights which do not serve the cause of aviation," said the Prince. "Only properly prepared long-distance flights by duly qualified pilots using suitably equipped machines can be of value to the future of aviation," he added, deploring "stunt" flights "by people who often have less common sense than a chicken."

"As President of the Federation," he continued, "my only idea is to protect aviation."

Asked if trans-Atlantic flights could be of any value to aviation he replied in the affirmative; but, he said, "they must have a co-efficient of safety suitable to the radius of action and far above the usual. If proper security is insured and the machines are equipped to fly the distance required, trans-Atlantic flights can be of incalculable value."

By Annette

JUST TAKE A PEEP IN THE SHOP AT THE ATTRACTIVE NEW COTTONS

It has so much snap, and it's so easy to make up and wear. It was originally in a tub silk—skippier blue dotted in white. It has two collars! The caplet covers the arms sufficiently to take the place of sleeves, and contributes its bit toward femininity. The scarf collar in matching tone of the ground of the print with decorative ends in red carries out the smart idea of tricolors.

The pointed treatment is slimming. Style No. 248 is designed for sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust. The 36-inch size requires 3 1/2 yards of 35-inch material with 1/2 yard of 35-inch light and 1/2 yard of 18-inch dark contrasting and 3 1/2 yards of binding.

Plain crepe silk, eyelet batiste, chiffon prints, batiste prints, linen, and rayon novelties are only a few of the many smart fabrics.

Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Building construction in France is showing a slight increase

May Make Shipments Of Cattle Monthly

Reservations Being Made With Council Of Western Beef Producers

Additional ocean accommodation recently made available to them will permit the Council of Western Beef Producers, with headquarters in Calgary, to ship creditable numbers of beef cattle to the British market in every month between now and January, 1932. Reservations have already been made by one rancher for space in the latter month, and many others are making their plans to forward their cattle under the auspices of the Council later this season.

Sixty head of light animals left Lethbridge recently for Glasgow, via Quebec, while 160 head of heavier went from Bowden, Lethbridge, Camrose, and Tofield areas for shipment overseas. These will about clean up the feed cattle controlled by the Council in this district, and subsequent shipments will be of grass-fed animals.

To Ensure Fair Profit

Feed Must Be Included In Price Asked For Lambs

An average spread of \$154 between the cost of feeder lambs and the price at which they sell is necessary for profit, according to a table of production costs appearing in the current issue of the Economic Annalist, official organ of the agricultural economics branch of the Department of Agriculture. These figures were obtained from a close study of conditions reported by 16 representative feeders in southern Alberta. The two most efficient of this group of feeders kept operating costs down to 38 cents per head while the two least efficient showed a spread of \$264 per head. For the average feeder to make a profit he must sell his lambs at not less than \$154 per head over their cost to him as feeders.

World's Largest Steer

Weights 3,300 Pounds and Measures Over 10 feet in Length

"Wonder" is the largest steer in the world. Lean, he weighs 3,300 pounds, and his owner, E. E. Huffman, believes that he can fatten him so that he will weigh 4,000 pounds. "Wonder" is seven years old and was born on the ranch of Ralph Clummet, near Burwell, Neb. From the tip of his nose to the tip of his tail the steer measures 10 feet eight inches.

Weekly Cattle Shipments

Southern Alberta Co-Operative Plan Regular Overseas Shipments

It is planned by the Southern Alberta Co-Operative to move overseas 50 to 60 head of cattle weekly from the Lethbridge district and arrangements for this summer are being made with the steamship companies. Growers are putting their cattle for export on sweet clover pasture and chopped grain rations which will put them in splendid shape for the trade.

Winnipeg's Industrial Progress

Col. John B. Reynolds, vice-president of the Middle West Utilities Company of Chicago, states that Winnipeg's industrial progress has been noted in commercial centres of the United States. He congratulates Winnipeg on its method of organizing its facilities for development.

FORCED DOWN

Laura Ingalls (above) diminutive but widely-known aviator, who was forced down by storms while on a proposed one-stop trans-continental flight from California to New York. Miss Ingalls is expected to hop off as soon as weather permits, on a solo hop to Europe.

Search Finally Rewarded

Eggs Of Harris Sparrow Found North Of Churchill

Discovery of the eggs of the Harris Sparrow, the last North American bird whose eggs have remained unknown to science despite searches over more than a century, has been made by Dr. George Sutton, a Pittsburg ornithologist, who has returned from ice-covered wastes on the western shore of Hudson Bay.

Dr. Sutton's discovery came in the climax of a race with a group of scientists of the Canadian Ornithological Society, while both expeditions were camped less than a mile apart. For nearly three weeks the groups raced to be the first to find the last link in the chain of more than 1,300 known birds of this continent.

The eggs, smaller than those of robins, pale green, with mottled brown marbling, will be presented to Carnegie Institute. They were found in a rhododendron-like bush near the ice, 40 miles north of Churchill, Man., on June 18.

The expedition spent two months in the Arctic, collecting birds, plants and insects. Its members, besides Messrs. Sutton and Stimp, were Dr. Lloyd, Saskatchewan ornithologist, and Olin S. Pettigill, photographer, of Brandon College.

Gathered Up Some Gold

Chinese Miner In B.C. Had An Exciting Experience

Carried three-quarters of a mile when he fell head first into a mine with a fifteen-mile current at the low, he, Chinese miner, had a narrow escape into the tallings at the end of the mine.

Probing a deep wound over one eye in the hospital at Quessell, B.C., later, Dr. R. G. Baker, removed a quantity of gold-bearing black sand and a fair sized nugget embedded there when the face of the Chinese struck the riffles at the bottom of the mine. His body was literally covered with abrasions.

"Eatium too much water," was his only comment to the doctor.

There was once a man so good at languages that he could translate the American dialect as it came in over the radio.

To make cellars more attractive, heating engineers are now making furnaces in pastel shades.

Alberta Society Of Artists Is Formed With Object Of Raising Standard Of Art In Province

Method Was Simple

Invention Of Dr. Babcock Revolutionized The Dairy Industry

Dr. R. M. Babcock, whose invention 41 years ago of a simple way of finding the amount of butterfat in milk revamped the whole dairy industry, is dead. He was 88 years of age but had been still working away on various research problems at his private laboratory at Madison, Wis., where he had been almost a recluse for many years.

Born and schooled in New York State he joined the staff of the University of Wisconsin in 1887 and the first announcement of his invention came three years later.

Its importance lay in the fact that it brought full value for the product of his herds to the farmer who kept high grade stock, whereas formerly he had received from the creamery no better price than had been given the seller of an equal quantity of milk of low content. It also protected the manure sturting end of the dairy interests in that it made adulteration or watering of milk by diabolical farmers easy of detection.

Dr. Babcock's method, like many another important discovery, was the embodiment of simplicity. Under it today a given amount of milk is sampled from the produce of a farm, poured into a graduated beaker or test tube, an equal amount of sulphuric acid is added, and within a few minutes the butter fat has come to the top with its amount indicated by the standard markings on the tube. Another benefit of this discovery was the improvement in dairy stocks which it made certain. It became a guide for the farmer to determine whether a given cow should be retained in the herd as a money-maker and mother of future income, or sent to the butcher.

Value Of The Newspaper

Use Of The Columns Of The Local Paper Best Aid To Business

The director of a well known mercantile establishment describes the local newspaper as "our best clerk." He explains that it sees more people, gets more of their individual time, works longer hours, and tells its story with more accuracy than any other clerk they can employ. These papers are going into the homes of people, and are assured of their friendly attention. This is proved by the tremendous growth in importance of the press in the last few years, according to the director, who declares that today the local newspaper is the backbone of any constructive sales effort.

Professor Makes Hot Ice

"Hot ice" is the product of an amazing scientific experiment recently made by Prof. P. W. Bridgman of Harvard University. With a machine that exerts a pressure of 600,000 pounds to the square inch, Prof. Bridgman makes "ice" that is as hot as a cup of steaming coffee, and boils eggs by compressing them. In Prof. Bridgman's machine hardened steel flows like putty.

A machine that cuts wood into matches turns out 40,000 splints a minute.

Worried by crop deterioration and price depression the west has not forgotten art.

Recently a chair of music was established at the University of Saskatchewan and now Alberta has organized a society of artists, with headquarters at Calgary and branches at Edmonton and other points.

Announcement of the formation of the Alberta Society of Artists is made by Dr. W. G. Carpenter, director of the Institute of Technology and Art. No members have been elected as yet, and it is anticipated that only two or three will be named during the first year. Adjudication by eastern Canadian, British or United States experts has been promised for works by aspiring artists.

One of the chief activities of the society will be to organize and assist art clubs and sketch clubs in cities, towns and villages throughout Alberta. Members of the clubs will not necessarily be members or associate members, but the society will sponsor their exhibitions, help with raising prizes, and later organize scholarships for promising students.

It will bring loan exhibitions by Alberta for display not only in larger centres but in the smaller towns. It plans to establish an art gallery and to present exhibitions of amateur and professional work in competitions in art much after the manner followed by musical festival organizers in the realm of music.

"For many years educationists in Alberta have felt that the standards of art should be raised in this province," states Dr. Carpenter. "At the institute we felt that the development of art should be raised in this way by an association of artists and teachers, a man whose personality and interpretation could be used as a foundation on which to create an entirely new school as distinctive in character as the Italian, Flemish, English or Dutch schools. We believe that we have such a personality in A. C. Leighton, R.B.A."

Mr. Leighton has been named temporary president of the new Alberta society.

Conference On Grain Production

Important Meeting To Be Held In Conjunction With World's Grain Show

The conference on grain production and marketing, to be held in conjunction with the World's Grain Exhibition in Regina, last summer, may well "prove to be the most valuable and ultimately the most important part of this world event," stated H. S. Fry, Saskatchewan Wheat Pool Publicity Director, addressing the opening session of the annual convention of the Canadian Weekly Newspapers Association. He mentioned that a programme of the various conference sessions is being prepared under the chairmanship of Dr. J. H. Griedel, Deputy Minister of Agriculture at Ottawa.

How He Understood It

A young lad of six years got to pondering about Biblical matters recently and came to his mother to ask her exactly why Christ was killed. She happened, however, to be busy at the moment; moreover, she didn't want to get him embroiled in philosophical affairs too early in life. "He was killed," she explained, because the people didn't understand Him, and thought he'd got away with the thing rather neatly—until a day or so later. Then she came upon him in the nursery, solemnly explaining to a playmate that Christ was killed because He couldn't speak English.

First Place In Butter Exhibit

Out of seventy-five competitors, the largest exhibit ever made, Manitoba took first place in the butter exhibit at the recent Brandon Fair.

"Ah, now I have again forgotten what it was I remembered that I had forgotten."—Kasper, Stockholm.

BRITISH FLEET VISITS GERMAN HARBOUR

For the first time since the Great War the British Fleet paid a visit to Kiel Harbour, Germany, and was enthusiastically received. The main picture shows the new British cruiser "Norfolk," nearest camera, at right, at her moorings with the German ships, "Kolnberg" and "Karlsruhe" on the left. Inset shows the hoisting of the British Ensign on the "Schleswig Holstein" by German sailors in honour of the British Fleet's visit.

SUNDAY SCHOOL LESSON

AUGUST 2

PHILIP'S MISSIONARY LABORS

Golden Text: "They therefore that were scattered abroad went about preaching the word."—Acts 8:4.
Lesson: Acts 8:5-10.
Devotional Reading: Matthew 13:36-9.

Explanations and Comments

Reading and Explaining God's Word, verses 22-35.—As we saw last week the persecution of Christ's followers after the Martyrdom of Stephen forced them to flee from Jerusalem, and they went everywhere preaching the word. Philip, like Stephen, was one of the seven deacons who, early in the history of the Church had been selected to help in the work, went to Samaria, where he was very successful in gaining converts to Christ. In the midst of his labors there he was suddenly directed to leave that field and go southward on the road that led from Jerusalem to Gaza. Our text says that an angel told him not to tell us who was the chosen messenger. "A vision, a dream, a human agent, some natural circumstances or instrument, all these are in Holy Scripture or in contemporary literature styled God's angels or messengers. Men saw them more deeply than we do, recognized the hand of a Superintending Providence where we behold only secondary agents, and in their filial confidence spoke of angels where we should only recognize some power."

Philip obeyed the divine compulsion, and met a man of great authority, the treasurer of Caesarea, queen of Ethiopia, who was returning from Jerusalem where he had been to worship. "Candace" was not a proper name, but like "Pharaoh" in Egypt, or "Cesar" in Rome, was the title of the ruler. Tradition gives this man of Ethiopia the name of "Indich," and "Trenesus" and "Eusebius" make him the founder of Christianity in Arabia Felix, and Ethiopia. Since he had been worshipping in the temple at Jerusalem he was a Jew, a proselyte, a heathen converted to Judaism. When Philip saw him he was sitting in his chariot and with him was a prophet Isaias. "Like a man reading at daybreak and tilling his book at every angle to catch the light of the rising sun, so this African adjusted his soul to every ray of truth that he could intercept."

The man was reading aloud, as was the way with Orientals. Jewish rabbis taught that what was read aloud would be remembered, and they often insisted upon this practice. Philip felt impelled to approach the chariot.

"Understandest thou what thou readest?" at once Philip questioned. "How can I, except some one shall guide me?" the treasurer returned, and at once invited Philip to enter his chariot and sit with him.

The passage which the treasurer was reading was Isaias 53:7, 8. "Of whom speaketh the prophet thus?" he asked.

And Philip opened his mouth—this is a Hebrew expression indicating that the words uttered were not spoken by chance but with deliberate purpose and bearing upon this scripture, preached unto him Jesus. Doubtless he told the treasurer how Jesus had fulfilled the prophecy, and how by His death He had provided a way of salvation for all who accepted Him.

Accepting God's Word, verses 36-40.

"Faith within and water without are ready," as Bengel says, and the Ethiopian asked to be baptized when they reached a pool. Philip gladly baptized him, though a Gentile and a Negro, and then was led by divine prompting to leave him and go to Azotus and then on to Caesarea.

Mining Equipment Carried By Plane

Diamond Drilling Is Now Under Way In Northland

New mining history is being written in the northland. Diamond drilling operations are under way on the shore of Hunter Bay, Great Bear Lake, within ten miles of the Arctic Circle. The property under examination, discovered by Dominion Explorers and Ventures, Ltd., is said to contain a massive body of copper sulphur ore.

More than 27,000 pounds of drill equipment and supplies were flown into Hunter Bay by two pilots and work is proceeding 24 hours a day—because just now the sun doesn't set at all up there.

Canada's Wool Clip

Canada's total wool clip is about 21,000,000 pounds annually, while Canadian mills use at least twice as much as this every year and Canadian consumption of manufactured woollens equals about four times the clip.

Some butterflies have a strong perfume.

Fast Service, London To China

Opening of the new 7,000-miles combined air-rail service through the heart of Siberia in June has brought London, England, within eight days of Shanghai, China. By the fastest surface transport the journey occupies 89 days. Already the new service is well patronized.

World's Grain Exhibition

All the Canadian provinces will be represented by provincial exhibits in the new building of the World's Grain Exhibition and Conference at Regina in 1932. These will total a space of 11,000 square feet.

Order Of St. John Of Jerusalem

Service Held In Westminster Abbey To Commemorate Centenary Of Revival Of Order

The Duke of Connaught, Grand Prior of the Order, the Duke and Duchess of York, and other members of the Royal Family were present at a service held in Westminster Abbey to commemorate the revival in Great Britain 100 years ago of the work of the Order of the Hospital of St. John of Jerusalem. The centenary address, delivered by the Archbishop of Canterbury, Prelate of the Order, was broadcast throughout the world.

The congregation included members of all grades of the Order, and the numerous uniforms added colour to an imposing scene. The band of the Grenadier Guards played before the service began. The men of the Ambulance Divisions of the Order, seated in the South Transept; the women of the Nursing Divisions marched in procession to the same part of the Abbey from the West Door, led by the Duchess of York, their commandant-in-chief, who then took her place in the Sanctuary. There she was joined some minutes later by the Duke of York, in the uniform of the Royal Air Force, Princess Louise, Princess Beatrice, Prince and Princess Arthur of Connaught, Princess Alice, Countess of Athlone, Princess Helena Victoria, and Princess Marie Louise.

At the conclusion of the service the Grand Prior and Chapter General, who were seated in the cloisters by a guard of honour of the Westminster School O.T.C., went to the Great Hall of Westminster School, which had been lent to the Order for the occasion, and there presided over the annual General Assembly of the Order. The Grand Prior read messages of congratulation from the Commandery in South Africa and the branches of the Order in Australia and New Zealand, and an address was presented to the Grand Prior from the branch of the Order in Canada. There was also a message from the Commandery of the Order in Sweden. The Sub-Prior then read a message from Mr. Bennett, the Prime Minister of Canada, announcing that, in view of the good work done by the Order, the Canadian Government had decided to exempt it specially from the scope of the resolution of the Canadian House of Commons, in conformity with which the King has refrained from bestowing any titles or honours upon his Canadian subjects. In consequence of this communication, his Majesty had been pleased to invest several Canadians with the insignia of various grades in the Order recently at Buckingham Palace—London Times, England.

Look For Big Apple Crop

The B.C. Provincial Government Horticulturist estimates the apple crop in the Kootenay and Arrow Lake districts of British Columbia, at 93,000 boxes as against 75,000 boxes last year.

Fairbanks, Alaska, only 120 miles south of the Arctic Circle, is hot enough at times for people to be overcome by heat.

Recipes For This Week

(By Betty Barclay)

A VERY GOOD STEW

(Serves 8)

- 2 pounds sirloin steak.
- 2 large onions.
- 2 tablespoons fat.
- 4 medium potatoes.
- 4 large carrots.
- 1 can peas.
- 1 tablespoon lemon juice.
- 4 cups water.

Salt and pepper to taste.
Put the fat in large stew pan. Heat until melted. Add the onions finely chopped. Then put in the meat cut in small pieces. Simmer until a light brown. Add the four cups of water and let cook slowly until meat is tender—about 1½ hours. Dice carrots and potatoes. Add to the above and cook 20 minutes longer. When ready to serve add the peas and lemon juice and heat. Thicken with a little flour and water.

CHRYSAEMUM SALAD

(Serves 6)

- 6 small oranges.
- Lettuce.
- Apples.

Cut through the skin of oranges three-quarters of the way down and in very fine strips, being careful not to break strips apart. Remove orange pulp and cut in pieces. Place each orange skin in a bed of lettuce leaves and fill center with orange pieces and long slender pieces of apple. Serve with any desired dressing.

Ask Federal Aid

Want Assistance In Carrying Out Public Works In Saskatchewan

Federal assistance in carrying out a public works programme in excess of \$2,000,000 will be asked by Saskatchewan as an unemployment relief measure for the next twelve months, Mayor John W. Hair has stated.

A payroll of \$70,000 per month for about a year would be assured if the suggested request is accepted to by the federal authorities. This would be sufficient, the mayor believes, to provide employment for all jobless married men in Saskatchewan. No plans are being made for single unemployed, the contention being expressed by the mayor that their problem was a purely federal matter.

Without a Country

"I am a woman without a country," declared a delegate at the Women's Co-Operative Guild Congress at Cheltenham, England, in an appeal to the government to allow a woman to retain her nationality after marriage. She was married to a Swede, who died three years ago. Through long residence in England her husband had lost his own citizenship, and by her marriage to him she now had no nationality at all.

Sutor: "Do you ever peep through the keyhole when I am sitting in the parlor with your sister?"

Small Brother (with a burst of candor): "Sometimes, when mother ain't there."

Hospital Opened At

Chesterfield Inlet

Will Serve Nomadic Eskimo and Trappers In Far North

Blahou, Tarsuelli and four nurses, members of the Grey Nun Hospital, arrived at Churchill completing a long journey from Quebec by Canadian National Railways. The party was en route to Chesterfield Inlet, 800 miles north of this Hudson Bay port, where the farthest north hospital on the continent opened last week. The veteran Roman Catholic churchman, known throughout the continent as the "Bishop of the Arctic," left with the nurse in his 25-foot motor boat on the hazardous trip along the rocky west coast of Hudson Bay.

With the opening of the hospital Hls Lordship sees the realization of a dream he has had for nearly two decades in the barren country of northern Canada. The hospital will serve the nomadic Eskimos and the dozen of trappers that search for fur on the northern fringe of civilization. Educational courses in hygiene are planned for the younger generations of Eskimos.

Interesting War Relics

Regina Man Has Complete Set Of German Plaques

Interesting, if grim, relics of the passions and hatreds stirred by the Great War, are brought to light by J. H. Hall, of Regina, into whose possession has come a complete set of reproductions of the plaques struck by the Government of Germany commemorating various outstanding events during the dark days of 1914-1918.

The plaques were distributed to the citizenry and soldiery of Germany with the object of bolstering morale and stirring up hate, chiefly against England. They depict, among other things, the sinking of the Lusitania, Lord Northcliffe as a disseminator of lies, the triumphant German soldier conquering a figure symbolic of the Allies. All the plaques have considerable artistic merit.

A Strange Craft

Dipper Dredger Built On Tyne Has No Propelling Machinery

The strangest craft ever built on the Tyne, a dipper dredger named the Cyclops, left the river recently for the Havre (France) port authorities. The Cyclops has no propelling machinery, but her remarkable plant enables her to raise herself in the water by means of four "legs," each 70 feet long. These "legs," which can be operated rapidly, jab into the river or seabed. The dipper can tear into solid rock and scoop up 10 tons of material at a time.

Did Not Improve Matters

Clergyman's Small Daughter (to caller)—"Oh, my! But aren't you homey."

Her Mother—"Laura, what do you mean by such rudeness?"

Laura (righteously)—"I—I—I meant it for a joke, mamma."

Mother (innocently)—"Well, it would have been a much better joke if you'd said: 'How pretty you are.'"

Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

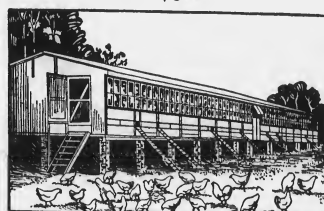

WINDOLITE
THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but

allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

CUT DOWN

BROODER
HOUSES
LAYING PENS
DAIRY BARN
SUNROOMS
ETC.

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

Distributors: CHANTLER & CHANTLER LIMITED
51 Wellington St. W. TORONTO, ONT.

Truck Driver: "Accelerate? Of course I accelerated. What did you think I was going to do—stand still and let you smash me up?"—The Humorist, London, England.

WORLD HAPPENINGS BRIEFLY TOLD

The mineral output in South Africa in a recent month was valued at nearly \$20,500,000.

There were 26 concentrated milk plants in operation in Canada in 1930, whose value of output totalled \$13,694,743.

British Columbia lumber circles are organizing to take immediate advantage of market extension possibilities thrown open by the new Canadian-Australian trade treaty.

A periscope, designed to fit a man's hat, enabling him to see a bandit, should one sneak up behind him, will be shown at the International patent exposition in Chicago.

A small bear, an owl, and 20 quails formed part of the cargo of an air freighter that arrived at Croydon, England, from Paris, France.

An exceptionally fine copy of the first edition of the works of Chaucer, the poet, printed in 1532, was sold for \$11,250 at an auction sale recently. Despite keen bidding from United States dealers the prize was secured by a London dealer.

The gold medal and diploma for creamery butter, in the largest exhibit of its kind ever shown at the Saskatoon Exhibition, went to Manitoba Co-Operative Dairies, Winnipeg, with a score of 193.8.

Two Japanese dailies in Dairen, South Manchuria, the Manshu Nippo and Dairen Shinbun, have started to issue Sunday evening papers in addition to their regular morning and evening papers every day.

It is not at present possible to tell when a policy regarding a proposed Peace River outlet will be enunciated, Hon. R. J. Manion, Minister of Railways and Canals, said in the House of Commons.

Miss Millie Orpen, who was awarded \$25,000 in a suit against a movie theatre, which remained open on Sunday in violation of a blue law, more than a century old, renounced the award and said she never had intended to collect it, but sued only as a test case.

Destroying Arabic Alphabet
Determination is shown by the government of Turkey to stamp out the Arabic alphabet. A special government commission made the rounds of Turkish departments at Angora and burned all books and papers in the taboo characters except a few historical documents.

"I hear you have a brother, doctor."
"Yes, and he is the exact opposite of me in every way."
"How nice. I should much like to make his acquaintance!" — Der Gemutliche Sachse, Leipzig.

Winnipeg Newspaper Union

By Annette

YOU'LL LIKE THIS SIMPLE ONE-PIECE HOME FROCK WITH ITS SLENDERIZING LINES

It's made in a jiffy! Practically only four seams to join! The youthful v-shaped neckline is most becoming. To begin with there is an inset vest with a softly falling jabot frill and attached collar in deep river styling. There is still another point, the interesting modern, large pockets. The removable belt may be worn at line best suited to wearer. Style No. 750 is designed for sizes 16 years, 36, 38, 40, 42, 44, 46, 48 and 50 inches bust. Size 36 requires 3 yards of 38-inch material with 1/2 yard of 35-inch contrasting.

It has many possibilities for contrasting effects. Yellow and white dimity print with plain cocoa brown dimity is individual and smart.

Skipper blue linen with white dots and plain white trim is so attractive.

Printed lawn, shantung, shirting fabrics and ginghams are lovely suggestions.

Price of pattern 25 cents in stamps or coin (coin preferred). Wrap coin carefully.

CHAPTER XXIV.—Continued.

"I'd be proud to be thought in the same class," retorted Nick. "He's a real man. And he'd be suffering now if he hadn't known that most of these hands have no running stream. He saved every drop of water aboard the 'Sea Bird'; but if we're not picked up in another week someone has got to go—or dig a well!"

"But those small boats—how long would they live if another hurricane came up?"

"Five minutes, perhaps; but what else is there to do now that the yacht has gone to pieces on the bar? Myer could send the men, of course, but I'd rather be doing something—yet you object if I even build a fire! Do you want to spend the rest of your life here?"

"That 'at'! And you're not even decently polite."

Her childishness made Nick grin, and restored his good humor.

"Wonder," he said, "if Robinson Crusoe was a Chesterfield! I'm sorry if my manners offend you, Angela, but I'll admit that I feel on edge today, and want to get off by myself. I can't get out of my thoughts, and how she must be suffering. Perhaps the 'Sea Bird' wasn't mentioned in the papers; but it's long past the time when I should have been back, and it makes me crazy—it makes me wild—to think—"

He broke off suddenly, and strode away. Angela started after him, then stopped, and looked down at her clean white shoes. For no toilet requisite—nothing that could add to her personal adornment, even shoe polish, had been left behind when the "Sea Bird" was abandoned. Angela preferred hunger and thirst to looking unattractive. She gazed with scorn at Amy Myer's unpolished Oxfords; at Nick's collarless neck; at the Colonel's soiled Palm Beach suit. She rebelled at the thought that in another month her own clothes would begin to appear grimy. Now, although she resented for a tramp with Nick, she could not endure the thought of soiling her daintiness; and he was evidently in no mood to wait while she changed to something suitable.

Angela sank down on a seat that the despised captain had cleverly constructed from a barrel, and gazed gloomily out to sea. It was a scene of enchanting loveliness, but she looked upon it with blind eyes. She was thinking of Nick, angrily, and with a sense of helplessness. She admitted that she had never worked so hard to gain a conquest—yet she had evidently failed. She felt baffled—humiliated—enraged, and with it, miserably unhappy. It made her furious that a quiet little woman like

CORNS

Lift off - No Pain!

Just a drop or two of Putnam's on any sore corn and out comes the pain. The corn shrivels up and drops off. No scar, no pain, no pinching from tight shoes. You can dance or walk in comfort. Use only Putnam's Corn Extract. Satisfaction guaranteed. Sold by druggists everywhere.

PUTNAM'S

W. N. U. 1900

Gay Hastings could hold a man captive—her own husband, too, whom she hadn't seen for weeks! Who was she anyway, to have married a man like Nick who had such wonderful possibilities? What a glorious lover he would make! His was better looking than any man Angela knew. His was handsome even without a collar, and how many men could stand that test? Take him away from provincial Bakersville—that stupid bank, and his stupor with and babies, and he would go far—get anywhere. But to see him wasting himself providing for a family that grew with indecent rapidity—

Angela's lip curled in disgust. Jim had implied that she could not succeed. Her face grew hard, and she would succeed! She would win Nick Hastings if only to show Jim Halliday that she hadn't lost her charm. After all, a desert island was not a escape; give her a month more, and she never failed. . . . and perhaps

Angela smiled, but her face was not beautiful, nor her eyes innocent, as she looked out to sea.

As for Nick, he tramped on desperately, his mind filled with regrets that he knew were futile. He had done what at the time had seemed the sensible thing to do, yet he was torn with the thought that he should have gone home at the completion of his business. The old nervousness that had been his before leaving Bakersville, was back upon him. People irritated him, especially Angela. He wished she would transfer her attentions to the Colonel, who would doubtless appreciate them. It might keep him from talking so persistently about the coast of Maine, a subject, which, for some mysterious reason, always put Angela on edge.

Nick wondered, as he tramped along, if her distance for the subject had anything to do with that horrible story which the Colonel had recounted the night before the hurricane—the night Angela had kissed him. He had hardly thought of it since. There had been too much to think about; yet the whole thing was queer; her behaviour after the story—the midnight confidence she had forced upon him, and the kiss—mostly the kiss. It struck him for the first time that Angela was truly, and he hated to think about it, a subtle people. What was it Gay had once said about not trusting Angela Halliday?

Gay! As always, the thought of her was like the touch of a cool hand, when the realization of what she was suffering rushed back again, and he could have wept. Suddenly, realizing that he had walked too rapidly in the hot sun, he sought the shade of a pump of palms, and threw himself down, looking for a moment across the blue—searching the horizon for the ship that did not come.

After a while his gaze crept back to the land, and what looked like a scrap of paper caught in the underbrush not far away. Who could have come, though a couple of days, and he had come here with Angela and Amy. Pure curiosity made him arise and grasp it. In the wilderness anything pertaining to civilization is of interest. It was evidently a sheet out of a letter to which there was no beginning, and no end. The writing was unfamiliar, but instantly he saw Gay's name and read:

"Gay Hastings' baby coming in September—first part, and Nick don't know a thing about it. He told me he wasn't feeling well, and she thought if he knew he'd think he couldn't leave her. She was a real smart, and I got a notion Dr. Bennett's worried. I asked him plump out, but he didn't say a word. He was the way he is—always acts like it's none of my business. Anyhow I hope Nick'll get back soon. She nearly died last time, and those boys' is getting a handful though old Mr. Bartlett helps her a lot. That's your old like to know we was all well.—Little Martha."

In a flash Nick understood. This was a letter to Julie Nipps, who had a passion for writing letters. It was a letter to Angela. Julie disliked Angela but she would write to Satan himself if she thought he would reply. She watched for the postman as he came with a mouse. Gay, out of pure sympathy, was always sending her picture postcards when they were away.

He sank down hastily. What did this mean, anyway? He read again about this time: "Gay Hastings' baby is coming in September." In his surprise he thought: "It's a lie; but why should Julie invent a yarn like that?" Then saw light. Why, it was true! Of course it was true! That was exactly what Gay would have done if he thought that he needed rest, and freedom from anxiety. What a dupe

he had been not to have guessed! A host of memories crowded back upon him by which he might have known had not been absorbed in his own worries. And the things he had said about expenses—about contracting doctors' bills—about their keeping well for the next year. . . . Of course he would tell him she had to. And now—what was she thinking—what was she suffering—alone—

SCIATICA?

Here is a never-failing form of relief from sciatic pain:

Take Aspirin tablets and you'll avoid needless suffering from sciatica—lumbago—and similar excruciating pains. They relieve; they don't do any harm. Just make sure it is genuine.

ASPIRIN

TRADE MARK REG.

ing what she had gone through for little Nick—thinking, perhaps, that he was never coming back to her. . . .

Nick turned, burying his face in his arms, longing for the relief of tears that would not stir. Then came a thought that filled him with blazing anger: Angela had known! No mail had reached them since leaving Kingston. She had had this letter all the time, and had let him start out upon this cruise knowing that his place was at home. How could she? Had she no sympathy for Gay—no understanding of her need of him? Even though Angela had never had a child, she should have known instinctively that, had he understood, no cruise however alluring would have tempted him.

September—the first of September, and it was now July. It might be months before they were picked up. He arose shakily, filled with an insane desire to put his hands on Angela's slender throat—that lovely throat that made such lovely music—and choke her till she begged for mercy. He started toward camp, then stopped, appalled at his own thought. He must calm down before he faced his friends. He must control himself before he talked with Angela.

He turned about, and began his patrol where he had left it off, walking rapidly, his thoughts in a wild chase. He looked neither right nor left. Beauties that should have stirred him he passed unnoticed. Suddenly he realized that he was breathless, and that he had reached the point of land where he had meant to file brush for a signal fire. He paused, and looking out to sea, uttered an exclamation of incredulity. He shaded his eyes with his hand for a long moment; then turning with furious anger, he began making a pile of leaves—of twigs—of branches of a tree—that would burn, working like mad before he stopped to gaze once more across the water.

Faint, almost imperceptible, yet nearer than it had been before, a final spiral of smoke was visible against the horizon.

(To Be Continued)

Miller's Worm Powders are a pleasant medicine for worm-infested children, and they will take it without objection. When directions are followed, it will not injure the most delicate child, as there is nothing of an unpleasant nature in its composition. It will speedily rid a child of worms, and restore the health of the little sufferers whose vitality has been impaired by the attacks of these intestinal parasites.

Appliances For Railroads

Latest Marvel Detects Invisible Cracks in Steel Rails

Railways can now have the services of an electrical appliance that will detect invisible cracks in steel rails, a condition that has caused so many wrecks in railroad history that it has become known as "rail cancer." This latest marvel was worked out by Emery G. Sperry, gyro wizard, just before he died a few months ago. Recent tests have proved that, through the application of electrical current, fissures are disclosed that otherwise would grow until the rails fell apart.

Would Not Change Places

"What wages would you want?" asked a district farmer of a prospective hired man in the employment office at Stratford, Ontario.

"Thirty dollars per month," was the reply.

"I'll tell you what I'll do," said the farmer. "You take the farm, work the same as I am doing and I'll work for you for \$30 a month."

The prospective hired man declined the offer.

Good Word For Canada

"If I were a young man with my future all before me I would go to Canada," said Mr. Hon. Stanley Baldwin, Britain's Conservative Leader, in the course of an address at Hull. He was referring to unemployment, and expressed the hope the industrial field overseas might offer as good a home, and perhaps a better home, than for many years our people had been able to maintain here.

Will Follow Viking Route

MacMillan Plans To Fly To Iceland By Way Of Labrador and Greenland

Donald B. MacMillan, veteran Arctic explorer and perhaps the most famous of all American navigators who have spent years of research and discovery in the land of the midnight sun, has decided, for the present, at least, to cancel the plans he had made previously concerning a flight to London, England. The veteran explorer had hoped to carry postcards and covers on his flight to the greatest city in the Empire, the proceeds from which it was planned to be used in the education work conducted by the commander in Labrador.

Although the explorer was sorry that he could not carry out his original plans, he announced that he would make his aerial survey as was outlined before, and in stating his intention to continue the second part of the flight as originally planned, Commander MacMillan said the purpose of his flight were as follows:

"On an aerial survey of northern Labrador, which is really a continuation of my work begun in 1927 and in no way is intended as a demonstration of the practicability of a northern air mail route to England. Interest is not in any proposed route or in trans-Atlantic flying. I am, however, deeply interested in helping Sir Wilfred Grenfell in his welfare work and in co-operation with him and Dr. Alexander Forbes, of Boston, in a survey of the last 300 miles of northern Labrador.

"This year the 'Bowdoin' will be devoted to the work of surveying part of the Labrador coast in conjunction with the aerial survey which I hope to make. I am also interested in the welfare of a school of 40 Eskimo children in Labrador and in the work carried on for 170 years by the Moravian missionaries. That is one reason why my schooner 'Bowdoin' leaves every year loaded with supplies for the poor people of Labrador. My other interest is in the story of the Vikings, their discovery of America, and their home in Greenland and Iceland. Therefore, I am planning to fly to Iceland by way of Labrador and Greenland."

Error Discovered In Time

Tablet In Memory Of Dickens Almost Placed On Wrong Building

A tablet unveiled in Montreal on May 31, to commemorate the fact that Charles Dickens had lived at Rasco's Hotel during his visit to this city in 1842, would have been placed on the wrong building had it not been for Dr. A. H. Atherton, professor of English at the University of Montreal, and past president of the Montreal branch of the Dickens Fellowship in North America.

A few years ago a well-known French-Canadian artist painted a picture entitled "Rasco's Hotel, Bonsecours Street," which showed a little, picturesque, tumbled-down building. The Montreal Dickensians, recalling that Dickens had boarded at Rasco's, were delighted with it, and decided that the original of the picture should be honored with a tablet. As luck would have it, a copy of the picture was shown at a Dickensian meeting at which Dr. Atherton was present.

"What's this? What's this?" exclaimed the doctor. "Rasco's Hotel, Bonsecours Street? Rasco's Hotel was never in Bonsecours Street. It is in St. Paul Street."

Astonished officials of the Montreal branch at once hurried to the spot, and found that the doctor was right. There in St. Paul Street they discovered the real Rasco's Hotel, not a small, dilapidated building, but an imposing stone structure, whose identity was further emphasized by the fact that it had its name in great relief letters on the front facade.

Dinner: "What sort of pudding is this?"

Waitress: "We call it college pudding, sir. Like it?"

"No. I'm afraid there's an egg in it that ought to have been expelled."

An instrument has been invented to measure the force of an earthquake.

What do the shoes cost?

"Twenty shillings."

"Not so dear!"

"For that each shoe, of course!"

—Die Musikete, Vienna.

Flaws In Steel Rails

Remarkable Instruments Detect Defects In Track While Moving At A Fair Speed

Looking into steel rails for invisible flaws, two remarkably equipped cars have been travelling over western lines of the two Canadian transcontinental railways during the past few weeks.

Moving at a fair speed over the rails these robot detectives mark the invisible faults that might cause a split rail, and forever damn the guilty rails in the eyes of section crews by automatically painting them white. Up in the car the needle of one of the instruments is tracing a continuous line on paper. When the rails are good the line is comparatively level. When a flaw is traversed the infallible needle bounces, or ducks, and down goes the white splash of paint. Invented by the late Mr. Sperry, these cars are leased to railways by the Sperry Rail Detector Company, of New York. Each carries its own chief operator and motorman. Over every section of track covered, the local section foreman follows with his gang, to make immediate replacements.

THE RHYMING OPTIMIST

By Aline Michaels

WIND FROM THE SEA

Tonight the wind is from the sea. And bears the tang of salt to me. Just here, the bonnyrocky grows, And there the trellis with the rose Stands close beside the garden gate To tempt the passer with its freight Of wine-sweet, petalled loveliness. The daisies in their snowy dress Along the pathways nod and bend As gracious women greet a friend. Yet when the wind is from the sea It brings strange messages to me; I feel, within, a sudden need Of stinging spray and drifting weed. Of sea-weed red as any rose Tossed lightly where the strong tide flows. Ah, I would know the press and surge Of ocean in its restless urge; Tonight the wind is from the sea; What can the roses say to me?

Aeromobile May Be Speedy

Vehicle Driven By Air Propeller Invented In Germany

Great speed at low cost is expected from the aeromobile, the machine recently invented by two German inventors. The vehicle is described by them as an automobile driven by an air propeller. The air screw lies horizontally on the back part of the chassis. Above it are several parallel plane surfaces forming a sort of lattice-work arrangement, the angles of which may be altered. The air stream produced by the propeller breaks through these surfaces, providing the driving power.

Minnesota In The Lists

Preparing To Enter Exhibits At World's Grain Show

Minnesota producers are getting ready to enter the lists against those of other countries in the competitive classes of the World's Grain Exhibition and Conference to be held at Regina in June. A campaign is now being conducted by the Minnesota Crop Improvement Association among its members with the purpose of encouraging them to prepare special plots so that they may thus secure high class samples to enter in the various classes.

Mothers have a pretty bad time.

"Why?"

"Well, they're always afraid that some girl will marry their sons and that some men won't marry their daughters."

What are Smith's two daughters like?

"The elder is terribly simple and the younger is simply terrible."

TO GREAT BRITAIN and back

SPECIAL REDUCED third class fares from Montreal to Belfast, Glasgow, Liverpool, Plymouth or London and back. Good going from Aug. 1st to Oct. 15th

Return portion valid for 2 years. Round trip rates to Continental points reduced proportionately. Two sailings a week.

For full information apply to CUNARD LINE 278 Main Street (Phone 24-84) Winnipeg or any steamship agent.

Little Helps For This Week

"The Lord bless thee, and keep thee; the Lord make his face shine upon thee, and be gracious unto thee."

—Numbers vi. 24, 25.

In having all things, and not Thee, what have I?

Not having Thee, what have my labors got?

Let me enjoy but Thee, what further crave I?

And having Thee alone, what have I not?

I wish to see, nor land; nor would I be Possessed of heaven, heaven unpossessed of Thee.

—Francis Quarles.

There is no holiness if the Lord withdraw His presence; no wisdom if His Spirit ceases to direct. In our own nature we are as unsettled in the sand upon the mountain; but in God we have the stability of the throne in heaven. Kindle, O Lord, our hearts with light and life by the holy fire of Thy love and blessing.

—Thomas A. Kempis.

Dehydrated Apples

Stocks On Hand In The Okanagan Valley Now Practically Exhausted

Stocks of dehydrated apples in the Okanagan Valley have practically been exhausted. Only very small amounts are in the hands of packers. Since fresh apples have not been available there has been a good demand for the dehydrated product. Reports from the east say to the effect that only small quantities are now on hand, not over 2,000 boxes, all told, are in the hands of evaporators.

Persian Balm is aluringly fragrant. Adds a charming refinement to the most finished appearance. Creates and preserves complexion of surpassing loveliness and texture. Softens and whitens the hands. Cools and dispels all irritation caused by weather conditions. Swiftly absorbed by the tissues leaving never a vestige of stickiness. A priceless toilet requisite. Invaluable to all women who care for elegance and distinction.

Abattoir For Saskatoon

The Saskatchewan Livestock Producers have arranged to build a small abattoir in Saskatoon costing approximately \$75,000.

Night flying has been introduced for the first time regularly on a British commercial air route.

Cactus plants, which now are grown through all parts of the world, were American natives.

Took It Before Childbirth

"I first took Lydia E. Pinkham's Vegetable Compound before childbirth because I was so weak."

"After taking it, I felt much stronger, I could sleep better and I could do my work."

"I have taken the Vegetable Compound for eleven years off and on whenever I need a builder and I recommend it." Mrs. Emily Schindler, Remond, Saskatchewan.

This is only one of thousands of letters praising this simple, home remedy and recommending it to women who need a strengthener.

Lydia E. Pinkham's VEGETABLE COMPOUND

Enterprising Merchants Win Business By Persistent and Energetic Advertising Weekly

They create an atmosphere of activity and confidence—they tell people what they have to sell and what the cost will be—they indicate by their advertising that they are up and doing and are putting forth every effort to keep business going in their own community. People shop where they are invited.

Personal and Local

Mr. and Mrs. Frank Graham and children left on Tuesday by auto for Edmonton, to spend two weeks holidays.

Mr. and Mrs. Herb Sherratt and Matt Brennen are spending a week's holiday at North Fork and Waterton Lakes.

Mr. and Mrs. A. McQueen of Mercool visited Mrs. H. McLeod during the week, and Miss E. McQueen visited with Mrs. Nielson.

Andrew Dow of the Palace theatre is running slides in connection with the "Preserve the Forest" campaign. Ranger Boulton states this is greatly appreciated.

J. Emmerson left on Sunday morning via Kettle Valley line for Victoria, to spend his annual vacation. Mrs. Emmerson is spending a few weeks there.

"Drifting Down the Trail to Dreamland" is the name of a copyrighted song written by two Coleman boys. Roy Price wrote the words, and Thomas Blower this music.

Mrs. S. L. Wilson and baby have returned home to Kellogg, Idaho, after spending some months with her parents, Mr. and Mrs. Frank Paterson. Mrs. W. G. Fraser accompanied her for a two weeks visit.

A correspondent from Coleman writing to the Calgary Herald suggests the obliterating of the crud and irritating advertising signs painted on the rocks of the Frank slide. This might easily be done by knocking to pieces those rocks bearing these signs, and imposing a penalty on any persons who might have such poor taste as to try and place any further signs on the rocks.

LOCAL NEWS ITEMS

Mr. and Mrs. Geo. R. Neil left on Sunday for an auto tour to Edmonton and other points. McKen Hunter is in charge of the store during Mr. Neil's holiday.

Keystone duplicate receipt books, convenient pocket size, very useful. About 80 receipts in a book. Duplicate of receipts retained in book. Sold at Journal office, 25c each.

Feeling became very keen at the football match last Thursday evening between Corbin and Coleman, several of the onlookers becoming very much "het up" in their excitement.

Mr. and Mrs. L. Lindoe, Mrs. R. P. Borden, and William Balloch took part in the tennis tournament at Lethbridge. Bill Wright, noted authority on sports, also went down to take in the tournament.

Mrs. Beaton of Medicine Hat is visiting Mrs. J. L. Lonsbury. On Sunday in company with Mrs. Lonsbury, Mrs. Ferguson and Joy, a visit was made to Waterton Lakes Park, where a delightful day was spent.

Mr. Melville Anderson, of Anderson & McLean, eight specialists, of Calgary, announces next visit to G. R. Powell's, Coleman, Tuesday, Aug. 4th. 20 years experience and regular visits assures you of satisfaction in all optical work.

Two young men from Coleman started out to see the world, traveling by side door pullmans, and reached Vernon, B. C., where they decided to return to their native haunts. They had a pleasant experience, but home looked better than distant pastures after they reached them.

Ross G. Powell is down from Calgary spending part of his summer vacation at his parents' home. J. McLane, of Calgary, came down and is installing an X-Ray machine in the hospital. The machine is the gift of the Canadian Legion, Elks Lodge and collections by the war memorial committee.

CLASSIFIED ADVERTISEMENTS

FOR SALE—Brass bed and springs, leather Davenport, good; Oak bedroom suite, Kootenay cooking range, various sundry articles. Apply to Mrs. Jas. Scott, Second street.

COTTAGES for rent by day, week or month, at most beautiful spot in Crow's Nest Pass. Apply A. Morency, Crow's Nest Lake.
